Enfin, concernant les performances, le programme se partage essentiellement entre art sonore et musiques rituelles, brutistes, électroniques et post-industrielles... En premier lieu, nous sommes curieux du *Feedba* acoustique de Virgile Abela. Un dispositif qui repose sur un pendule type Foucault dont la lente oscillation po de quelques rotations génère une modulation traduisant les effets de la gravité. Cette installation a été conçue en coordination avec la plateforme MAS (Laboratoire de mécanique acoustique du CNRS).

The Heralds, Scotland, by Sarah Urwin Jones on 7/03/2022
